***** Sheet Layout *****

Figure 1 is a schematic diagram of a quantum circuit with four qubits. The qubits are represented by horizontal lines. The first three qubits are initialized to state $|a\rangle$, and the fourth qubit is initialized to state $|b\rangle$. The circuit includes several gates: a CNOT gate between the first and second qubits, a CNOT gate between the second and third qubits, a CNOT gate between the third and fourth qubits, and a multi-controlled NOT gate with three controls on the first three qubits and one target on the fourth qubit. The final state of the fourth qubit is labeled (h) .
